

PHYSICAL CONFORMATION REQUIREMENTS

Conformation Defects which *will not be acceptable* for a sale are as follows:-

1. Bad "K" knee with sever splay from the knee outward on foreleg.
2. Front leg turning in badly with the shoulder movement pushing the leg under the body.
3. Front leg turning in and bowing from the knee.
4. Badly off-centred knees especially if only one leg is affected (benched knees).
5. Seriously back at the knee either on one or both legs as well as very slack pasterns.
6. Twisted cannon bones in front or behind as well as ringbone and windgalls.
7. Severe sickle hocks with bad curbs either on one or both hind legs.
8. Hocks bent inward (cow hocks) severely with feet turning out either on one or both hind legs as well as spavins and thorough pins.
9. Heavy straight shoulder with very short neck with weak hind legs and quarters.
10. Roach back and dropped hips.
11. Under developed and badly prepared horses.

Conformation Defects which are acceptable:

1. Sway back
2. Parrot mouth
3. Slight splays and slight pigeon toes
4. Straight hind leg
5. Light boned, light framed, especially fillies
6. Small splints
